

Starships D6 / RanCorp Motherbird-Landing

RanCorp Landing Craft

The Motherbird landing craft is a swift and manuverable vessel which allows RanCorp to deploy up to 8 squads of troops, 2 APCs and 5 speeder bikes into a battle. The vessel looks like an asymmetrical tear drop with a ramp extending from the underside of the pointed back. The ramp pulls down from the bottom of the point while the engines sit atop it. Farther up is the troop compartment and then the crew quarters. And at the rounded head of the craft is the cockpit. The vessel is streamlined and beautiful but is very dangerous and holds many soldiers.
