

Vehicles D6 / Gustav Light Infantry and

Gustav Light Infantry and Communications Walker

The Gustav is part of rancorp's MGS walker line. The MGS line is a series of one man walkers that turn any infantry troop into a war machine. The Gustav is fairly light on the weaponry but has the advantage of carrying a heavy communication's package for relaying tactical data to all the soldiers on the battle line. The Gustav can also enter areas where not even a repulsor vehicle can go, making it invaluable. Though lighter on weaponry than the other MGS series walkers, it can be modified to carry extra weaponry by a free-lance owner.
