800mm Tromp Cannon

The Tromp Cannon is a vehicle add-on made by a designer at the Cron Horizon Corporation. The weapon fires a massive 800mm slug at amazing speeds. It was deadly accurate and could hit it's maximum range in 2 and a half seconds, thus making it a powerful weapon of large-scale destruction. Unfortunately the weapon has an obscenely long cool-down rate taking forever to be fired again. Later, the designer was committed and declared insane when everything he said were variations of the words "Narm" "Vroom" "Moo" and "Tromp" and began leaping on top of other designers' heads.
