Tiger-class Mobile Suites

Tiger-class Mobile Suites {(TiMS) pronounced "tims"} is the latest model in mass-produced mobile suites. Very fast and maneuverable, they are designed to get in, take over a base, and then defend it. The Romefeller Foundation surpassed itself by producing the Tiger. The Tiger draws heavily on design influences from the Tallgeese and Epyon. Able to engage in most kinds of standard MS missions (including planet defense and superiority combat on land and in space), it is a highly prized mobile suit for its versatility, heavy armor, effective weapons, and shields. Also, in a departure from standard MS design, the Foundation equipped the Tiger with a hyperdrive and suitable navicomputer.
