WRITE-UP NOTES:

There was not much said about the new Cylon Raiders in the miniseries, but from how sleek and different they looked from the original models, and what was said about the Cylons expanding and conquering, it is obvious that they are advanced models, but the Colonials have their own advancements and can still take them on. While many of the systems are upgraded, some systems remain the same because the Cylons have not found or needed to build anything better yet that is cost effective for their expansions.

DESCRIPTION:

-In the 1995 Wildstorm Comic Book miniseries, Battlestar Galactica: War of Eden:

The Galactica and its fleet have traveled the stars for roughly twenty yahren. Over that time, there have been many changes. Adama was placed in cryogenic sleep due to katai syndrome; Apollo has assumed command of the Galactica; Ty has become president of the Quorum of Twelve; Athena has taken his place as Colonel and second in command of Galactica; Starbuck commands the mighty Viper squadrons, Boomer as his second in command and has a daughter; Boxey has grown up and become a

warrior in his own right. Sheba and Apollo have been sealed and have had a child of their union, named Cain after his grandfather; and many other changes.

But on the other side of the conflict, the Cylons are ever expanding their influence. They send expedition forces in ever direction, conquoring new systems and entire galaxies, and adding whatever new technologies they find to their own, advancing themselves and becoming a greater threat to both the Colonials and the universe at large.

Baltar is still alive and as relentless as ever, continuing his persuit of the Galactica and its fleet of refugees. He intends to rule them utterly and he will not give up the hunt. He uses the Cylon's expeditionary forces to get a beed on their fleet, then follows up with his own basestar, Hades, and whatever forces he can bring to bear. Having followed the fleet across entire galaxies, Baltar is now able to force his influence outside the shadow of the Imperious Leader. He has gained a device called the Warp Corridor Generator and installed it within Hades, and it allows him and whatever ships that follow to chase the Colonial fleet across the stars, albeit somewhat slower than the Temporal Overdrive.

The new Cylon Raider model is the result of all the upgrades the Cylons have done over the twenty yahrens since the destruction of the Twelve Colonies. It is built under mass production within limits to make it more effective, yet cheap enough to have overwhelming numbers of, much like the previous models of Raider from the past.

Yet, the Colonial Warriors still enjoy blowing them to Hell and back...

-Campaign: Stargate-Alliance: In my campaign, the new Cylon Raiders have not been introduced yet. Baltar has followed the fleet to the very edge of the Milky Way galaxy and lost much of his forces due to the Tau'ri interfering at the moment he had caught up to them. having lost many basestars and other resources, he sends his findings back to the Imperious Leader. Being so close, reinforcements is sent in the form of upgraded Cylons, Basestars and Raiders. Having some of his own prototypes survive destruction, he begins plotting against the Colonials and their new allies...
