Description: The Shivan Dragon is easily the most impressive fightercraft we have yet seen. Its maneuverability is unmatched, and it has quite a few other advantages, including a good top speed, powerful afterburners, and strong shields. It is the only Shivan fighter we have been able to study up

close, and we have learned a great deal about Shivan engineering from it. It seems that the Shivan shield systems are extremely strong, but their hulls are far weaker than our own. They also rely on primary weapons far more than secondaries, as evidenced by the Dragon's small capacity.

The GTA considers the Dragon as a Class A threat.
