

## GTW-7 Banshee

An electromagnetic weapon - sends rapid pulses of exceptionally strong electromagnetic energy resulting in a  $1.63 \times 10^5$  J blast that forces its way through any known shield technology and produces a dramatic shearing effect which quickly destroys the target ship's materials - named for the fact that in an atmosphere, the pulse creates an atmospheric disturbance similar to a quasi-human scream at 140 dB - uses up a tremendous amount of available ship energy - already, it has been used by many GTA fighter aces and test pilots as a coup de grace, although such a use for this massively powerful offensive weapon is officially viewed as poor sportsmanship by the GTA.

The GTW-7's impressive anti-shielding capabilities make it the weapon of choice against the Shivans. The main limitation of this weapon is low weapons compatibility. It can only be fitted on a GTF Valkyrie or a GTF Hercules.
