Description: The Chaser is a fast transport and courier vessel built by Stockli Industries who are more famous for their bulk transports, and with a cost matching many Starfighters the Chaser has proven one of the corporations few slow selling designs. The Chaser has unmatched sublight and hyperspace drive systems for a transport, and matches starfighters for speed and handling, and has been adopted by a number of mercenaries and bounty hunters as their vessel of choice, providing enough cargo capacity and performance to impress even these demanding individuals. Chasers have been refitted into bombers as well, changing their modest cargo hold into a delivery system for aerospace missiles and bombs as well as heavier anti-capital ship explosives. But the transport is not designed for the rigors of heavy combat, and requires extensive modification to toughen its hull, modification which has corresponding effect on the transports speed and maneuverability.
