

Name: The

Sword of the Jedi

Type: Ancient Republic Space Vessel

Scale: Capital

Length: 5 Kilometers

Skill: Capital Ship Piloting; Sword of the Jedi

Crew: 120,000, Skeleton; 15,000/+10

Passengers/Troops: 10,000

Consumables: 15 Years

Cargo Capacity: 70,000 tons

Hyperdrive Multiplier: x5

Hyperdrive Backup: x20

Nav Computer: Yes

Space: 4

Hull: 6D

Shields: 1D

Sensors:

Passive: 20/0D

Scan: 40/1D

Search: 80/2D+1

Focus: 2/3D

Transports: 70 (starfighters were not in use when this vessel was designed, so some of the landing bays would now be used for fighters.)

Weapons:

Turbo Laser Cannon

Scale: Capital

Fire Arc: Front

Fire Control: 2D

Space: 3-15/36/75

Atmosphere Range: 6-30/72/150km

Damage: 7D

70 Laser Cannon Batteries

Fire Arc: (10 front, 20 back, 20 left, 20 right)

Scale: Starfighter

Fire Control: 1D

Space: 1-2/10/20

Atmosphere Range: 100-200/1/2km

Damage: 4D

6 Concussion Cannister Launchers

Scale: Capital  
Fire Arc: Turret  
Fire Control: 2D  
Space: 1/2/5  
Atmosphere Range: 50-100/500/500m  
Damage: 6D

Description: The Sword of the Jedi was built some seven thousand years before the battle of Yavin, designed to carry the Jedi and their families to trouble spots around the galaxy it was intended to become a mobile Jedi Academy. The vessel was co-funded by the Republic and the Jedi council, and crewed by Republic soldiers, although technically under the direct command of the Jedi Council and featured some of the best technology available at that time. It was a massive capital ship, based around the first known example of a Turbo Laser, which was the first laser weapon capable of handing out significant damage to a Capital ship, however the size of this weapon, measuring over 2 kilometers in length, forced the size of The Sword of the Jedi to be huge. The vessel was also equipped with early force shields, a powerful (for its time) hyperdrive system, and the common weapons of its time, Laser Cannons for dealing with smaller vessels, and conventional Concussion cannisters for dealing with capital ships. The Sword of the Jedi turned out to be hugely expensive, and fairly pointless, since there were few reasons to need to transport thousands of Jedi anywhere, so the vessel was forced into a publicity role (touring star systems to show that the Republic was protecting them) and use as a large cargo vessel. It was on a classified and secret cargo delivery run that The Sword of the Jedi disappeared on, brief searches occurred, but the Sith Wars weren't far off, and The Sword of the Jedi passed into legend.
