

Vehicles D6 / Republic Sienar Systems

Name: Republic Sub
Craft: Republic Sienar Systems Explorator
Submersible
Type: Submersible
Scale: Speeder
Length: 5.4m
Skill: Repulsorlift operation: Republic Sub
Crew: 1
Passengers: 5
Cargo Capacity: 1 Ton
Cover: Full
Altitude Range: Sea level to -2.5km
Cost: 1,600 (used)
Maneuverability: 1D+2
Move: 60; 160kmh
Body Strength: 6D
Weapons:

Description: The Explorator Submersible is the standard aquatic vessel used by the Republic throughout the galaxy, serving with scientific and diplomatic corps on world such as Calimari and Manaan. Fast and unarmed, these submersibles can carry a half dozen people and a large amount of cargo, allowing Republic forces to operate freely on water planets. During the Jedi Civil War, Explorators remained in use and due to the lack of interest that the Sith showed in water worlds these vehicles remained unmodified although many left in operation after the war had weapons added.
