Description: The Century Class Transport was introduced around the same time as the YT-1300, and serves a similar role as a light freighter and transport. The design is fast, with a good hyperdrive system and a decent shield system, although known to have a weak hull, but is generally believed to be no better or worse than its competitors. The Century has a roomy cockpit with an excellent field of view, and the top turret is controlled from a station in the cockpit, allowing the ship to be controlled by a single pilot, even though this is somewhat difficult. The passenger quarters are comfortable, and offer excellent views

outside the ship, being more like those aboard a passenger liner than a transport vessel, making this a good source of secondary revenue for the vessels owners.
