

MANDALORIAN BATTLE ARMOUR

Mandalorian armour is the very symbol of Mandalorian technological superiority, and the most common sight when facing Mandalorian forces. Although the armour is regularly improved and modified, the same general look is maintained, and armour suits from thousands of years ago are only slightly different on a visual inspection.

The armour is based on technology introduced to the Mandalorian Empire by the Juannar, who required advanced armour

and atmosphere suit technology to venture away from their homeworld. Adapted for use by the more physically robust Mandalorians, this technology gave their troops an edge in combat from the very start, and it is mainly down to this technology that the Mandalorians, who have been vastly outnumbered by their opponents in virtually every conflict they have ever entered, to become a feared and greatly respected fighting force throughout the galaxy.

Although Mandalorian troops are well disciplined and maintain a strict fighting order, they are encouraged to decorate their armour and individualise it, however even this small amount of encouraged individuality is forbidden when circumstances warrant, and Mandalorian armour is often modified for special missions. These modifications may vary from addition of extended air tanks for missions in hostile environments, right down to camouflage colour schemes for missions and service on jungle or ice worlds.

Description: The best armour that the Juannar and Mandalorian technicians could build, these suits cost millions of credits to construct. These suits are only issued to members of the Mandalorian Imperial Government, and the Mandalorian Emperors Elite Guard. Not only because of the value, but because of the honour attached to this armour it is NEVER allowed into the hands of non-mandalorians, since this would be considered a surrender of their Imperial power, and an insult to the Mandalorian people.
