

Massassi

Trooper

Manipulated by Sith Alchemy the Massassi have become a powerful species, and by skillful manipulation as they grow the Massassi become specialised into roles that the Sith require from them. Red skinned, with quills and bone spurs erupting from their skin, they are obviously powerful warriors, but Sith Alchemy has extended this, making them more powerful than their nature ever would.

This particular Massassi has been made into a soldier, this is the base model for all fighting Massassi, however for bodyguards Sith often add more and more changes and alchemical modifications to make them even more dangerous.

Resistant to the Force: The Massassi have been manipulated using Dark Side Alchemy for such a long portion of their history that they have become resistant to the effects of the Force. This increases all target numbers one level, or gives them a bonus dice to resist whichever is applicable.

Story Factors:

Reliance: The Massassi have become so changed by the Dark Side of the force, that they require its influence to survive. This means that the Massassi must remain near to the Dark Side aura of the Sith or they wither and die (-1D to highest attribute each day away from a Dark Side aura, when any attribute reaches 0D then the Massassi dies). However this effect can be offset by the ingestion of certain Sith Alchemical Potions.

Of all the Massassi variants the Pilot is perhaps closest to what the species once resembled, created to control the ships of the sith. They are human sized, lithe and agile, obviously descended from fast predators, rather than the hulking lumps of muscle that is now mainly thought of as the Massassi Species.
