Description: The Naboo Starfighter which so capably proved itself during the Battle of Naboo, became a real money spinner for Theed Palace Space Vessels, as the free advertising that winning the battle caused started orders rushing in for the nimble and fast N-1 Starfighter. However Theed Palace Space Vessels was a small company, originally founded to supply Naboo's need for starships using parts supplied from Nubia, and the Starship construction yards of Nubia had no wish to supply a competitor, so N-1 Starfighters were only sold in small numbers until a settlement was reached between the two worlds. However by the time the settlement was made, newer starfighters like the Z-95 headhunter had appeared making the market for the N-1 a rapidly shrinking one. While the N-1 is still a capable starfighter, it is rare to see one in the post-imperial era, and the difficult to find spares has led to the few remaining N-1's becoming cannibalised to keep each other flying.
