Description: After their defeat at Endor, the Galactic Empire was forced back from many of its holdings

across the galaxy, and started to have to face the Rebels (now New Republic) on more equal footing. This meant that the Empire had to start adapting some of the Rebels tactics to use against them. Amongst this was convoy raiding, a job for which the Rebel A-Wing fighter was perfectly designed for, so the Remenants of the Empire approached Sienar Fleets Systems, and asked for a ship with exactly the same role as the A Wing. The Tie Claw was the result, and as a third generation Tie it shares many features with the Tie Phantom and Tie Defender, but at a lower cost than either of these. The Tie Claw is an uprated Tie Interceptor, with a hyperdrive, and a specialised sensor package that allow it to scan convoys from outside their sensor range before deciding to attack.
