Equipment D6 / Holocomm

Name: Holocomm
Type: Handheld Communicator
Range: 100 kilometers (62 miles) or Interplanetary over the Holonet
Purpose: Long-distance communications
Availability: 2

Description: A handheld communications device which would project a hologram of the person being spoken to, while transmitting an image of the user to the recipient. They had a decent range, but during the High Republic Era were capable of transmitting over the Holonet between planets, but if this network was jammed, or otherwise unavailable, range was limited to around 100 kilometers.
