VerdanTech Skybounder Fast Attack Armour

An arm dealer on Kashan by the name of Tony Blackfist purcshased 15 MetaCorp Jumptrooper Armour sets from Metacorp for

sale to a buyer he and on Kashan. However as the suits were in trnasit his buyer dissapeared. Just as tony staretd to

wonder how he was gonna unload the armour suits, somebody took the problem out of his hands. The Temere Corporation

hijacked the shipment en route and stole the suits. Tony Blackfist believes the whole thing was a setup by Jason Random,

Temere Corp's president. After a couple months of studying the suits, Temere Corp sold the suits to VerdanTech.

VerdanTech studied the suits and made a whole bunch of modifications. they revamped entire pats of the suit. They did

little to disgusie the fact that thesy stole the design though they did make the armour look more "appealing". The suit

has very thick armoured glvoes, boots, helmet, and chest plated and softer more flexible armour around the arms, legs and

neck. Advamnced servomotor systems make the suit mvoe comfortably and amplify the wearer's strength incredibly. Because

they don't wanna cause too much trouble, VerdanTech churns these out slowly keeping the supply to a trickle, which pushes

the rather large demand up.
