Description:The Thunderbolt-class Starfury is the first atmospheric-capable space fighter used by Earthforce. As with the earlier Starfuries, it features a fuselage with four swept-back wings arranged roughly in an X formation, with each wing mounting a fusion-torch type engine. Unlike the earlier versions, the pilot is not in a standing position. Instead, the pilot and co-pilot are seated in

tandem in a classic fighter jet-style cockpit. Its primary purpose is as an aerospace superiority fighter as well as bomber.
