

Starship Cruise Missile Launcher

With the advent of the ground based cruise missile launchers a demand came to design a cruise missile launcher that could be installed on any capital scale starship to turn it into a deadly planetary assault weapon.

The TCM-SS was designed in record time using much of the same technology that was put forth into the TCM-LS. The TCM-SS does come with an added bonus, however. The atmospheric range of each missile has been doubled due to a superior fire control computer.

Model: Kashan Technological Development TCM-SS Type: Cruise missile launcher Scale: Capital Skill: Capital ship gunnery Crew: 6 Cost: 45,990 credits Availability: 4, X Ammo: 4 Fire Rate: 1 Fire Control: 5D Space Range: 1-25/100/250 Atmosphere Range: 2-50/200/500 km Damage: Varies by warhead type Game Notes: Missiles available for use include the TCM I and TCM II which can both have variants suited for use in a vacuum. The TCM I does 3D/2D/1D capital scale damage with a blast radius of 30/20/10 meters. The TCM II carries a high-yield nuclear warhead and does 7D/5D/3D/1D physical damage AND 4D/3D/2D/1D (ionization) EMP damage over a 25/12/7/3 space unit and 50/25/15/5 atmospheric blast radius (radiation rules also apply).
