

Starships D6 / BLU-107/B Durandal

BLU-107/B Durandal

Model: Mestic Munitions BLU-107/B Durandal

Type: Anti-runway cratering bomb

Scale: Speeder

Cost: 980 credits

Blast Radius: 20 meters

Damage: 4D+2

The Durandal was designed solely for the purpose of destroying runways. The bomb first penetrates the runway surface and then a delayed explosion buckles a large portion of the runway - damage much more difficult to repair than the crater of a general-purpose bomb. Note that a bomb hit toward the end of a runway might not destroy enough pavement to put the runway completely out of action.
