

## Corellian YT-920

The Corellian YT-920 light freighter was first introduced two years following the release of Corellian star cruiser which gained much fame serving as a priority diplomatic transport for the Republic. The YT-920 is a direct ancestor to many later designs - the YT-1210, YT-1300 and YT-2400 transports - and sports many of the same features.

Like most later models in the YT-series, the YT-920 consists of a disc-shaped fuselage with a cockpit extending off of the left side in an almost identical fashion as the YT-1300 (except on the opposite side of the vessel). On the ship's right side is a Corellian blaster cannon turret designed to be easily replaced by larger, more powerful weaponry at a later time.
