

## Starships D6 / Interstellar Alliance "Victory"

Name: Victory Class Destroyer  
Type: Interstellar Alliance "Victory" Class Destroyer  
Scale: Capital  
Length: 2990.31 Meters  
Skill: Capital Ship Piloting: Victory Class  
Crew: 600, Skeleton 150/+15  
Passenger/Troops: 2,000  
Crew Skill: Capital Ship Piloting 6D, Capital Ship Gunnery 6D+2, Starship Shields 5D  
Consumables: 20 Years  
Cargo Capacity: 150,000 Tons  
Hyperdrive Multiplier: X1  
Hyperdrive Backup: X6  
Nav Computer: Yes  
Space: 6  
Maneuverability: 1D  
Hull: 15D  
Shields: 8D  
Sensors:  
    Passive: 35/1D  
    Scan: 75/3D  
    Search: 150/4D  
    Focus: 5/5D

Fighters: 56

Transports: 8

Weapons:

1 Super Quantum Discharge Cannon (\*)

Scale: Death Star

Fire Arc: Front

Fire Control: 4D

Space: 1-25/50/100

Atmosphere Range: 2-50/100/200km

Damage: 6D

8 Heavy Quantum Discharge Cannons

Scale: Capital  
Fire Arc: Front  
Fire Control: 3D  
Space: 3-15/36/75  
Atmosphere Range: 6-30/36/150km  
Damage: 7D

6 Heavy Neutron Cannons

Scale: Capital  
Fire Arc: 4 Front, 2 Back  
Fire Control: 3D  
Space: 3-15/36/75  
Atmosphere Range: 6-30/36/150km  
Damage: 6D

12 Fusion Beam Cannons

Scale: Capital  
Fire Arc: 4 Front, 3 Left, 3 Right, 2 Back  
Fire Control: 4D  
Space: 1-10/25/50  
Atmosphere Range: 2-20/50/100km  
Damage: 5D

120 Anti-Fighter Pulse Cannons

Scale: Capital  
Fire Arc: Front  
Fire Control: 3D  
Space: 2-5/12/25  
Atmosphere Range: 200-500/1200/2500m  
Damage: 5D

10 Missile Launchers

Scale: Capital  
Fire Arc: Front  
Fire Control: 3D  
Space: 2-10/30/60  
Atmosphere Range: 4-24/60/120km  
Damage: 9D

Sensor Stealth System

Scale: All  
Fire Arc: All  
Fire Control: /  
Space: /  
Atmosphere Range: /  
Damage: +10 to difficulty to detect vessel, -2D fire control

(\*) - After using this weapon, the Victory class is totally powerless until it has recharged its systems, this takes 3 combat rounds to occur.

Description: The Victory class Destroyer was conceived by President John J. Sheridan of the Interstellar Alliance, to answer the new Alliance's need for a large, heavy assault capital ship with all the strengths of the Whitestar class Monitor and none of the weaknesses. This vessel was designed in cooperation between the Minbari Federation and Earth Alliance, and incorporates the very best of both race's technology as well as the advanced technology gained from both the Vorlons and the Shadows.

At 2,990.31 meters (1.857 miles) in length, almost twice the size of a Minbari Sharlin class War-Cruiser, the Victory class Destroyer has significantly greater firepower, and comparable speed and maneuverability to any other ship of her class. Armor consists of a Plasteel/Poly-Crystalline armor mesh, again based on Minbari armor designs, capable of deflecting/refracting over 80% of all energy directed at the ship's hull . In addition to having the toughest armor of any known starship, the Excalibur is also armed with the latest advances in defense grid technology that include a new countermeasures system that releases small metallic discs which can be fired from the ship. These discs break energy weapons down to their various frequencies. In normal space, the Excalibur has a maximum safe velocity of 3,000,000 m/s, but can obtain higher velocities in hyperspace.

It had been the intention of the ISA to provide the Victory class vessels with Vorlon bio-armor and shields, which would make the Victory class Destroyers more than a match for any starship traveling the space ways today. Unfortunately, due to a recent Drakh attack on the planet Earth, the surviving prototype Destroyer "Excalibur", was forced to forgo her scheduled stop over on Minbar and was rushed right into service. This decision was based upon the Victory class Destroyer's impressive performance during the battle with the Drakh, and the fact that it would take months to grow and merge Vorlon bio-armor over the hull of the new Destroyer... time the ISA did not have if they were going to find a cure for the biogenic plague released on Earth.

Victory class Destroyers are armed with newer, more powerful variants of the heavy Fusion beam cannons, Anti-Neutron particle weapons, phalanx plasma defense turrets and antimatter bolt cannons, as well as the infamous Quantum/Gravitic discharge cannon sported by the Whitestar fleet, with a LOW-END output of 2,000 Terawatts -  $2.0 \times 10^{15}$  watt . This beam is probably more powerful, given that it vaporized a Drakh Raider in a fraction of a second and the beam continued on for hundreds of kilometers. If comprised of materials much stronger than iron (our base material for determining the low-end figures) and if comprised of technology and armor superior to that of the Minbari, the output of this weapon would be on a scale of  $1.6 \times 10^{17}$  watt . It was also seen that the Victory is apparently armed with a heavy assault cannon, the most powerful energy beam weapon seen outfitted on a starship created by the younger races.

The main gun of the Victory class vessel is believed to comprise the total energy release of all power generated by the vessel's main reactor, and combines this massive energy discharge with a release of pure antimatter and the destructive force of the gravity based impact beam used to contain the antimatter stream, as well as several unknown principles unique to Vorlon based weapons. Given what was seen during the weapons test phase, the main gun of the Victory class Destroyer is estimated to have a LOW-END power output 5 Exawatts -  $5.0 \times 10^{18}$  watt.

Given that this weapon drains the Victory class vessel of all the power generated by her reactors for 60

seconds however, we can estimate that the maximum output of this weapons may be between  $1.06 \cdot 10^{21}$  and  $7.07 \cdot 10^{21}$  joule. This weapon can only be fired once however, as the power drain renders a Victory class vessel powerless for nearly 60 seconds, leaving the ship only her reserve fusion reactors to fall back upon .

Information on this vessel is scarce at present, as the project is still in the testing stages and the base where the new Destroyers were being constructed were destroyed by the Drakh following the betrayal of the project's head Sam Drake. New fleet yards are being built and this new breed of Capital ship might be in service in as little as three standard Earth years. At present there are plans to build approximately 800 of this class vessel, with each Victory class Destroyer possessing enough firepower to stand toe to toe with three or more enemy ships in the largest capital ship classification.

Only one Victory class Destroyer is in service at this time - the Excalibur. The Victory herself, the namesake of this new class of warship, was destroyed when she rammed the bridge of a Shadow planet killer. Newer production line variants of the Victory class may include the bio-armor that the prototype currently lacks.
