

Starships D6 / Lumnar Industries A-2 Gr

Lumnar A-2 Grappler Bomber

A larger variant of the A-1 fighter-grappler, the A-2 Bomber pack a devastating punch. The multiphase projectile launchers and their ammunition cases have been removed and an additional grappler arm has been added in. The two grappler arms were mvoed out to the sides just under the main body of the craft. The EMDW was kept in place and a full set of concussion missile racks was added. Five powerful drive engine are packed tightly together in the rear of the craft's fuselage. The grappler arms on the A-2 are smaller but more powerful. They do not contain a transport tube for the pilot to board enemy craft with. The A-2's grapplers are stricly for causing damage or grabbing onto other craft.
