

# Starships D6 / Taurus-class Mobile Suit

## Taurus-class Mobile Suit

The Taurus class Mobile Suite (TMS) was designed to be a space superiority suite that could cause significant harm to enemy forces, while being agile enough to move long distances at great speeds under their own power. Able to function as an atmospheric suite for the same purpose as well as a space suite, the TMS is the second most modifiable design currently in service. Widely mass-produced, the TMS allowed Imperial fleets to gain a significant advantage over under-equipped opponents. Renowned both for their anti-MS uses as well as for an anti-ship role they play excellently, the TMS is the best suite that is currently mass-produced.
