

Starships D20 / HattMark Industries Owarin

Owarin-B Bomber

The Owarin fighter looks quite similar to the X-Wing when the S-Foils are in cruise mode. However, when put into attack mode, you can see a definite difference. The S-Foils have a wider angle of movement than the ones on the X-Wing, giving it a much slimmer and taller sensor shadow. Had the Alliance been responsible for its naming, it most certainly would have been christened the O-Wing.

Instead of having four bulky engines attached to the wings, the Owarin has four attached to the rear of the chassis.

As with the X-Wing, the Owarin has its weapons mounted on the extremities of the wings. However, these weapons are of slightly different natures, as there are four wing-mounted torpedo launchers, and two ion cannons under the chassis.

The Owarin-B is the Bomber variant, capable of carrying large payloads of torpedoes.
