

RPGGamer.org Equipment D6 / Holographic Image Disguiser

Holographic Image Disguiser

Model: Corellidyne CQ-4.3x

Type: Holographic image disguiser

Cost: 35,000

Availability: 4

Game Notes: This small unit can be worn on a belt and projects an holographic image

over an existing real world object or living creature. The image projected had to be at least

the same size as the wearer, but is highly detailed and moved with the object or person

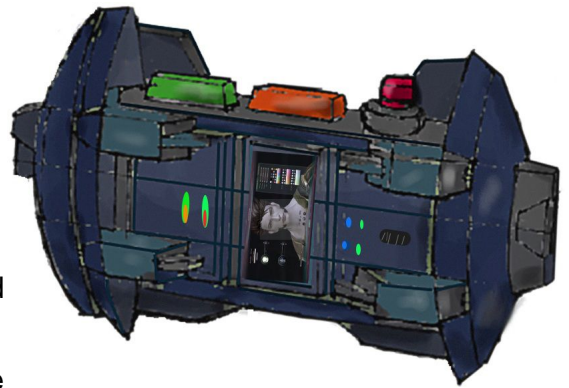

covered, Its memory capacity can store five holographic image and it can operate for 4

hours before recharging, though it's possible to hook it up to a larger power supply. The

holo-projection is almost perfect and even moves as the item or person shrouded moves.

It takes a Difficult search roll to detect a fake, though sensors, cameras and droids get a

+2D bonus to detect it.

Page designed in Notepad, Logo's done in Personal Paint on the Commodore Amiga
