Description: Either the SB Nahema class is a new Shivan bomber design, or the Shivans are finally

taking the GTVA seriously and bringing in their best ships. The Nahema is considered to be the Shivan's most dangerous bomber. It has demonstrated the ability to outrun virtually every fighter in the GTVA fleet. Its powerful laser banks and high-capacity missile bays make it a threat to combat craft of all types, as well as to capital ships.
