Special: The Pegasus is a stealth fighter, which increases difficulty to detect it on sensors by 3 difficulty levels.

Description: The Pegasus is used almost exclusively for reconnaissance missions. It's the fastest, most maneuverable ship in the Terran arsenal. The craft's contours and hull materials were carefully designed to minimize its profile to detection sensors. It is woefully armored and packs only minimal weaponry, making it a death box in a firefight. Pegasus pilots are a special breed of daredevils who pride themselves on getting into and out of situations that would be the death of other pilots, all without firing a shot.
