Description: The GTF Perseus is the newest fighter in the GTVA's arsenal. Slated to replace the

aging Valkyrie as the Alliance's primary interceptor, the Perseus's high max speed and maneuverability make it ideal to hunt and destroy enemy bombers. Perseus fighters have been assigned to the 3rd Battle Group on a trial basis, with wide deployment expected after the OpEval period. Primary weapons include the Subach HL-7 and Prometheus cannon, with secondary loads of Harpoon and Hornet missiles. Preliminary results have shown the Perseus to be a superb fighter.
