Description: The new Seraphim class bomber is the Shivan's latest threat. It is three times larger than a Nephilim, and carries a massive payload at least 150% the size of the Nephilim. With strong hulls and almost impenetrable shield system, the Seraphim is easily the most dangerous bomber we have yet encountered.

The Seraphim has been designated a Class A threat to GTA destroyers and cruisers. In unpopulated systems, it is to be considered a Class B threat.
