Description: Fast and highly maneuverable, the GVF Serapis is primarily used as a bomber interceptor. Its thin armor and weak shields give it a low survival rate in dogfights against more heavily armored fighters. Despite having only two primary and secondary weapon banks, the Serapis has been retrofitted to accommodate almost any loadout in the GTVA arsenal. Veteran Vasudan pilots love the Serapis for its agility and loadout options. Some Terran pilots who've been

privileged enough to fly it claim to prefer it to any Terran fighter.
