Starships D6 / GTW Akheton SDG

GTW Akheton SDG

The Vasudan-made Akheton SDG Advanced Disruptor was a direct result of the phenomenal success of GTA disruption weaponry in the Great War. The GTW-41x Advanced Disruptor subsequently underwent a retrofit and was pushed into mass production. With the exception of the Subach HL-7, more SDG units have been produced by the GTVA than any other weapon in history. The SDG is notorious for its demanding power requirements.
