

Starships D6 / GTM-12 Cyclops

GTM-12 Cyclops

The GTM-12 Cyclops has been in service for over 15 years in the GTVA arsenal. It is the standard ultra-high-delivery Secondary weapon loadout, utilizing the latest in aspect-seeking guidance technologies. The Cyclops has the distinction of being the most consistently upgraded weapon in the fleet. Although its development began shortly after the Great War ended, its excellent performance has kept it firmly entrenched in the role of main assault weapon. Its payload is approximately fifty percent greater than that of the older Tsunami warhead.
