Starships D6 / GTM-19 Harpoon

GTM-19 Harpoon

The GTM-19 Harpoon is the most sophisticated weapon in the GTVA arsenal. Not only is it the fastest aspect-seeking missile used by the fleet, but advanced fuzzy-logic circuitry enables it to gain lock faster than any other missile in its class. The missile's warhead is wrapped in a shell of ultra-dense depleted uranium, ensuring maximum penetration into the hull of its target before the warhead detonates.
