Starships D6 / Mekhu HL-7

Mekhu HL-7

The Mekhu HL-7 is the Vasudan re-engineered variant of the Subach HL-7 xaser. Modifications made to the design by engineers at Mekhu give it a higher firing rate and longer range than the original Terran version. These improvements come at the cost of a slight decrease in power output. This trade-off fits well with Vasudan military tactics, but most Terran pilots prefer the performance of the original weapon.
