Starships of the Border Worlds

Shipyards of the Border Worlds

Praqit Industries

(215 slips, construction multiple 1)

This Company, based over the rocky world of Praqit, is the largest local shipbuilding company in the Border Worlds. Designing mostly warships for the local governments, they have done plenty of business in both sectors.

Praqit Mobile

(110 slips, construction multiple 1.75)

As a competitor to Praqit Industries, they don't show much promise, but they do produce a modest line of fighters and transports that see mild use in the region, though most are sold to individuals and pirate bands.

Subpro

(350 slips, construction multiple 1)

Originally based in the inner rim, Subpro Corporation set up a sizeable shipyard in the Naislia sector to augment its home yards. This yard specifically builds many of the Z-95 Headhunters that they designed with Incom.

Starfighters

Subpro R-26 Cannibal-class

The Cannibal-class starfighter has only seen major use in the region around border, though some militias and smaller governments have been known to use squadrons of them, as well. With its sleek design and powerful lasers, it has been known to be able to take on as many as two other equal pilots simultaneously.

Praqit Mobile JJ-7 Mobile Bomber

When the small company of Praqit Mobile decided to design a bomber, they went for cheap and heavy. Thus, when the Mobile Bomber came out, it had an instant success that has slowed down much in recent years.
