Charcter Bio - Cade Skywalker was a Human male bounty hunter, smuggler, and pirate, who in his youth was once the Jedi Padawan of Wolf Sazen. The son of Jedi Master Kol Skywalker and Nyna Calixte (also known as Morrigan Corde), Cade was also a direct descendant of Luke and Anakin Skywalker. Cade was also the nephew of Nat Skywalker (also known as 'Bantha' Rawk) and his wife Droo Rawk, half-brother of Gunn Yage (though neither knew of the other's existence), and stepcousin of Annah, Skeeto, and Micah Rawk.

Raised as a Jedi by his father on Ossus, Cade turned his back on his heritage after being traumatized by watching his father's death at the hands of the One Sith. He eventually became a pirate and bounty hunter. After his existence and unique Force powers were discovered by Sith Lord Darth Krayt, Cade was unwillingly pulled into galactic affairs. Caught up in the power struggle between the Sith and the exiled Emperor Fel, Cade became willing to do whatever it took to ensure he was left alone.

After being briefly captured by the Sith, Cade escaped and was reunited with his childhood sweetheart, Imperial Knight Azlyn Rae. Together, they participated in a successful mission that saw the death of Darth Krayt. However, Krayt's traitorous advisor conspired to keep this fact a secret and appointed himself Regent over Krayt's Empire. After saving Azlyn's life, against her wishes, Cade and Azlyn's relationship fell apart. Angered by the destruction his actions continually caused, Cade left for Tatooine, where he began raiding Black Sun shipments. These events drew the attention of both his mother and his half-sister Gunn Yage.

After leaving Tatooine, Cade and his crew accepted a recovery mission on Wayland, site of the failed Ossus Project. There Cade encountered Darth Maladi, who was seeking to perfect a new Sith bioweapon. Cade attempted to heal Blue, who been implanted with the weapon, but to no avail. Wolf Sazen tracked Cade to Wayland and convinced him to use the light-side of the Force to heal Blue, which was successful. As a result of these events, Cade finally rejected the dark-side but resolved to not rejoin the Jedi Order, believing the Force shaped him for a different destiny, to destroy the One Sith.

Thousands of years before Cade Skywalker's birth, he appeared in a vision to the Jedi Master Q'Anilia, along with his ancestors Anakin Skywalker (as Darth Vader) and Luke Skywalker, as well as Zayne Carrick; all four of these individuals would later be affected by the Muur Talisman. The vision also showed Karness Muur, hundreds of Rakghouls, and a burning city.

Cade was known for his independent nature and his utter adverseness to having others sacrifice themselves for him. Like his ancestor Anakin Skywalker before him, Cade was reckless, headstrong, and often led by his emotions. He walked a fragile line between the light and dark sides of the Force, frequently unnerving his friends and Jedi companions with displays of his dark side abilities, while also frustrating his former master, Darth Krayt, with his resilience against the lure of the dark side's power. This resilience, however, impressed Celeste Morne, who said she had never met someone who walked so close to the dark side and yet was so resistant to its lure.

Furthermore, Cade exhibited a lack of respect for others (especially toward those in positions of power) to the point where he would openly mock them in public. After becoming a bounty hunter, Cade developed an addiction for death sticks which his mentor Rav used to keep him in his debt.

Cade was also, again like Anakin Skywalker, unwilling to let those he cared about go. His constant use of his healing powers to keep people from dying was proof of this,

Being a member of the Skywalker family, Cade was naturally immensely strong in the Force.

As a Padawan, Cade showed incredible potential in the ways of the Force, and was able to hold his own against a large number of stormtroopers and Sith during the Massacre at Ossus even as a simple child still in training.

His powers did not appear to atrophy in the seven years he spent in Rav's crew, despite rarely drawing on his powers in that time and his use of deathsticks. During a confrontation with Darth Talon on Vendaxa, Cade used the Force to hurl a crashed starship at the Sith, once more tapping into his anger to fuel his abilities. He later admitted that he could sense the Sith nearby, showing that his Jedi senses were as attuned as ever. When he attempted to rescue Hosk from the Temple of the Sith on Coruscant, he was able to sense the Jedi's presence from outside the mammoth structure.

He was proficient with telekinesis, capable of using a very powerful force push, on many occasions, like in the Sith temple on Coruscant against Darth Talon, where he threw the Sith Lady back with a powerful kinetic blast, injuring her.

He could also use Force Choke, a dark side power associated with the Sith, which he used against Gunn Yage. When Cade went to reclaim the Grinning Liar, Rav ordered all of his henchmen to attack Cade and while greatly outnumbered Cade singlehandedly defeated all of them.

Perhaps his most impressive and mysterious power was his apparently instinctive ability to use Force Resuscitation, which allowed him to revive Wolf Sazen from death. To do so, Cade tapped into the power of the dark side, and both he and Sazen felt the effect as a Force power with a similar appearance to Force lightning coursed over their bodies. The power he exerted even caused Cade's eyes to glow with Force energy. Within moments, Sazen had been revived, and he was soon able to talk and walk of his own accord. As Cade would later relate to Sazen some seven years later, the price for bringing his Master back from death was high: Cade admitted he "tapped into all the fear and rage" within him, and, as he told the Force ghost of Luke Skywalker, he was afraid that the hunger for power he felt that day was "not a good place for a Skywalker to be". Cade could also use this to purge other ailments from other beings bodies. Cade's use of the dark side was even
felt by Darth Krayt, from the New Imperial Palace on Coruscant. Krayt believed that this power would enable him to cheat death, and began a search for what he called "a dark light in the Force". It should also be noted that Cade discovered the ability that his ancestor Anakin Skywalker had desired for so long?to keep people from dying. Cade's ability to tap into the Force was so powerful that he was able to manifest and control Force Lightning to such a degree that he was able to prevent his ship from being torn apart by a large lightning Storm ravaging the entire planet. Cade later learned to use Force Resuscitation in coordination with the Light Side of the Force, which was apparently what was needed to overcome previous obstacles to its healing powers.

In addition to being able to heal people with his power, it could be used to hurt others that suffered a previous injury in moments, by allowing Cade to focus it into a point where their wound was[4], similar to finding shatterpoints. However, it is unclear whether it was shatterpoints that Cade was finding. Either healing or injuring someone with his Force ability, he can completely manipulate someone's body; it is entirely possible that this power is midi-chlorian manipulation.
