Description: The Desert Sail-20 Skiff was a small, open-air, repulsorlift utility vehicle.

The Sail-20 was similar in design to the Ubrikkian Industries Bantha-II cargo skiff. The sail skiffs were smaller in size however, and were designed to be used as one-man personal fliers. Unlike the Bantha IIs, the sail skiffs housed a pair of blaster cannons located on each side of the lower hull.
