Special Abilities
Multiple Mouths (2*D/6): Str+2 damage

Move: 0 (although the plant cannot move, it's mouths have a reach of 50m from the body)
Size: up to 100m

Description: Reeksa was a carnivorous plant native to Iego, with sharpened spikes for teeth and deadly thorns along the length of their stalks.

Reeksa roots were necessary for the production of the Blue Shadow Virus antidote. Jedi Obi-Wan Kenobi and Anakin Skywalker traveled to Iego to retrieve it. Whilst exhuming the root, the plant attacked the two Jedi, but after severing two attacking heads, the pair managed to escape.
