Description: The Light Infantry Utility Vehicle (LIUV), also known as the First Order snowspeeder (or snow speeder), was a wedge-shaped assault craft used in frigid climates. The snowspeeder was manned by one First Order snowtrooper, and could hold two others, one of which could take control of the forward-mounted FWMB-10 repeating blaster cannon. Snowspeeders were present at Starkiller Base during the Assault on Starkiller Base thirty years after the Battle of Endor. The Resistance-affiliated individuals Finn and Rey stole one in order to infiltrate the thermal oscillator, a key point of the base. They briefly dueled with another snowspeeder before forcing it to crash, and they soon arrived at their destination. Shortly after, their ally the Wookiee Chewbacca borrowed it to return to the starship Millennium Falcon.
