Technical: 1D

Equipped with:
Sand vacuum-head: Used for sifting valuable elements from sand.
90kg Cargo Container: Used for filtered elements
4 x Ambulatory struts
Rudimentary Vocabulator speech system (Binary only)

Move: 9
Size: 1.8 meters tall
Cost: 800 (used)

Description: The R-H029 sifter droid was a model of gray-colored, fifth-degree[2] sifter droid equipped with a sand vacuum-head. It stood taller than a fully grown human and moved about on four ambulatory struts. One such droid worked at the Resistance base on the planet D'Qar during the Resistance's conflict with the First Order. In the year 34 ABY, it was set up close to the landing site of the YT-1300 light freighter known as the Millennium Falcon during the final preparation for the Resistance's attack on the First Order's Starkiller Base superweapon.
