Game Notes: Stats above are for basic model. Rifle version adds Extended Barrel and Shoulder Stock: +1D to Blaster when used for one round of aiming. Sniper Variant adds air cooling barrel shroud: Doubles range.

The A-300 contained a power cell housing and an adjustable electroscope. The weapon had several variant configurations. The compact version of the A-300 had a collapsed barrel and removed shoulder stock. A rifle configuration contained an extended barrel and shoulder stock. It could also be configured into a sniper rifle by replacing the barrel with an air-cooling barrel shroud, which looks very similar to the A310 rifle.
