Vehicles D6 / Kuat Vehicles Undicur-class Ju

Craft: Kuat Vehicles Undicur-class Jumpspeeder
Scale: Speeder
Length: 1.84 meters
Skill: Repulsorlift operation: Undicur-class
Crew: 1
Passengers: 0
Cargo Capacity: 5kg
Cover: 1/4
Altitude Range: Ground level-150 meters
Cost: 3,000 credits
Maneuverability: 1D
Move: 140; 400kmh
Body Strength: 2D
Weapons:

Description: The Undicur-class jumpspeeder, more commonly known as the Jedi jumpspeeder, was a portable speeder bike designed and produced by Kuat Vehicles before the Clone Wars.

A compact speeder bike, the Undicur-class was designed to be sold alongside starships as utility vehicles, local transportation, and search and rescue missions. Their durable frame, coupled with the low-output repulsorlift engines, made them easy to produce and stow aboard ships like the Eta-class shuttle. Collapsible, their simple saddle and control panel were sufficient for short trips between a starship and a destination. During the Clone Wars, the jumpspeeders saw frequent use by the Grand Army of the Republic and members of the Jedi Order.
