Creatures D6 / Kiros bird

Name: Kiros bird
Type: Purple and blue bird

Dexterity: 4D
Perception: 3D
Strength: 1D

Special Abilities

Grabbing tail: Kiros Birds have a tail capable of grasping and carrying objects, making them somewhat useful when trained, and a reputation as annoying thieves in the wild.

Can understand speech: Kiros Birds can be trained to understand speech and follow simple instructions, making them useful household pets.

Move: 18
Size: 0.2m long
Orneriness: 1D

Description: A bird species was native to the planet Kiros. Darts D'Nar kept some of these as pets during the Battle of Kiros and planned to sell them had the Jedi not captured him. They were gentle animals, and were very tame. They also appeared to be quite intelligent little creatures, as one laughed when it saw Anakin Skywalker flirting with Queen Miraj Scintel.

They were remarkably similar in appearance to the convorees, but with different colored plumage.
