Droids D6 / Serv-O-Droid, Inc. RIC-series gen

Name: Serv-O-Droid, Inc. RIC-series general labor droid

Dexterity: 1D
Knowledge: 1D
Mechanical: 1D
Perception: 1D
Strength: 3D
    Lifting 5D
Technical: 1D

Equipped with:
    Humanoid Torso (two arms)
    Disc Mounted Treats
    One visual and one auditory sensor - human range
    Basic vocabulator

Move: 18
Size: 1.1 meters tall
Cost: 1,000

Description: The RIC-series droid was a general purpose labor droid manufactured by Serv-O-Droid, Inc. They were in operation during the last centuries of the Galactic Republic.

The RIC-series was a reliable, yet unsophisticated, labor automaton, roughly humanoid in shape, and propelled by a pair of disc-mounted treads. The design remained unchanged for centuries. RIC droids possessed limited artificial intelligence, with only rudimentary programming to carry out their tasks.

RIC droids found fame as nuna-ball players during the leadup to the Clone Wars; the Serv-O-Droid team beat AccuTronics' B1 team in a Nuna-Ball League game on Commenor. The agility, speed and endurance of the RIC droid team proved effective against the stronger B1 side. These games were popular among the patrons of several Coruscant nightclubs, including the Outlander.

Other RIC-series droids, including RIC-920, found work as rickshaw drivers on Outer Rim worlds such as Tatooine.
