Equipment D6 / Death Watch portable shield

Name: Death Watch portable shield
Type: Personal energy shield
Scale: Character
Skill: Personal shields
Cost: 2,000
Availability: 2, R

Game Notes: This shield provides 5D character scale protection against attacks. In use you must make a parry roll for each attack to get the shield in between the attack and your body. It is easier to parry attacks from longer ranges, as the wielder has more time to get the shield between themselves and the attack.
Target numbers of Parry are as follows:

- point-blank range is a Difficult task.
- short range is a Moderate task.
- medium range is an Easy task.
- long range is a Very Easy task.

Description: Around 20 BBY, during the battle of Sundari, renegade Death Watch members, mostly formed from the branch of Death Watch, the Nite Owls used a portable shield to protect themselves from Mandalorian super commandos.

After Darth Maul executed Duchess Satine Kryze on Mandalore in the Sundari Royal Palace, he imprisoned Jedi Master Obi-Wan Kenobi. Kenobi was rescued by the renegade members of Death Watch, led by the sister of the Duchess, Bo-Katan Kryze, and they started to escape from the Mandalorian super commandos, who were loyal to Darth Maul. After a firefight arose, several members of Death Watch activated the portable shields, in order to gain protection from the blaster fire of the commandos.
