Equipment D6 / Jogan fruit

Name: Jogan fruit
Cost: 1 credits
Availability: 1

Game Notes: Fruit used mainly as ingredient in cooking.

Description: Jogan fruit was a type of fruit found throughout the galaxy. Jogans were round and mostly purple, with white stripes and red leaves. Jogan fruits were found on such planets as Coruscant and Lothal, and could be eaten raw. It was also the main ingredient (and garnish) of jogan fruit cake, a baked dessert. They grew on jogan trees.
