Description: A Modified AT-TE Walker was used by Captain Rex, Commander Wolffe and Commander Gregor in the years following their retirement from military service. While traveling the dusty plains of Seelos, the clones used their modified AT-TE as both a mobile home and a hunting platform. The hulking walker was equipped with a kitchen, sleeping bunks, and railed walkways and adorned with lanterns and bug catchers.

The old Republic walker was destroyed after the Galactic Empire launched a ground assault on Seelos led by Agent Kallus but not before destroying an AT-AT in a walker skirmish.
