Planets D6 / Drexel

Name: Drexel
Region: Outer Rim Territories
Sector: Lol sector
System: Drexel system
Suns: 1: Drexel
Moons: 3: Three Moons
Grid coordinates: Q-18
Primary terrain: Ocean
Native species: Sea-dragon
Immigrated species: Humans
Major cities: Great Ship

Description: Drexel was the sole planet in the Drexel system. It was a water world, home to the sentient Sea-dragons.

The Jedi Knights exiled the corrupt Governor Quarg to Drexel, along with his fellow Human pirates. There, the pirates and their descendants created a unique civilization, centered around a sailing ship that was a mobile city. Quarg was succeeded by his equally corrupt son, the younger Governor Quarg. Some of the inhabitants of the city-ship revolted against Quarg's tyranny. The rebels created a new civilization. They used technology to communicate with native Sea-dragons, with whom they formed a symbiotic lifestyle, and thus became known as Dragon Lords. The Sea-dragons willingly allowed the rebels to ride them and took the rebels to dwell in underwater caves. The Dragon Lords waged constant war on Quarg. The baby Sea-dragons infested the city-ship, acting as spies. The crew of the city-ship ignored the babies, thinking them mere lizards, not realizing they were young Sea-dragons.

Many years later, the Dragon Lords finally defeated Quarg's son with the help of Leia Organa, Luke Skywalker, Han Solo, R2-D2, Chewbacca, and C-3PO, during the Battle of Drexel. Han Solo defeated the pirate Crimson Jack in orbit over Drexel.
