Equipment D6 / Gravitational field disruptor

Model: Gravitational field disruptor
Type: Tool
Scale: Character
Cost: 3,500
Availability: 2
Game Notes: Can be used to decrease the weight of objects allowing them to be more easily handled, providing an up to 3D bonus to lift that item. Or can be used to increase the weight of objects for practical jokes, providing an up to 3D penalty for lifting them. If used on a character or droid, must hit in combat at close range and gives them a 3D penalty to dodge due to increased mass.

Description: Gravitational field disruptors were common devices found in many stores, and were commonly used by merchants and transport operators to temporarily alter the gravity surrounding a specific object. The dedicated field created by the disruptor can be set to allow heavy loads to moved about with ease. They can also be modified to work in reverse, causing an object to suddenly become much heavier.

Princess Leia Organa used one of these devices to increase Darth Vader's porter's mass to the seventh power, causing him to plunge into a deep hole made by his own mass.
